

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, September 9, 2014 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Light (69 new fires)  
 New large fires: 1 (\*)  
 Large fires contained: 0  
 Uncontained large fires: \*\* 9  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 4  
 Type 2 IMTs committed: 2

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Predictive Services Discussion:** Dry and warm weather will begin to develop over California today as a ridge of high pressure builds off the Pacific Coast. Cool, dry, and breezy weather can be expected for the northwest U.S. today as an upper level trough and cold front make their way through the northern Rockies and Plains. This will allow cold, Canadian air to sink into Montana and Wyoming with accumulating snowfall in the mountains and cold, blustery rain at lower elevations. Ahead of this weather system there will be heavy rain and thunderstorms in the upper Mississippi Valley. For the southwest U.S. and central Rockies, abundant precipitation will continue in the form of showers and thunderstorms with flash flooding possible. Rain and thunderstorms are also expected today along a stationary front in the southeast U.S.

## AVIATION WATCH OUTs

*Aviation Category*

As part of risk management, especially during high activity fires, each aviation manager and employee should be asking questions.

- Is the flight necessary?
- Who is in charge?
- Are hazards identified and known?

Flight Hazards: Have they been identified and assessed? Have the pilots been informed?

- Should the operation or the flight be stopped due to a change in conditions? Consider the following:
  - Radio communications
  - Environmental conditions – weather, visibility, terrain, elevation, temperatures
  - Mission priorities
  - Successful mission completion probabilities
- Is there a better way to do it?
- Is there pressure to complete a mission at all costs?
- Can you justify your actions?
- Is the mission airspace confined or congested?
  - Multiple aircraft
  - Mixed types of aircraft
  - Poor visibility
- Do you have an escape route?
- Are any guidelines being ignored or policies being broken?
- Are communications getting tense?
- Are you deviating from the assigned operation or flight?
